Abhishek Tiwari

Full Stack Web Developer

PROFESSIONAL SUMMARY

Motivated Full Stack Web Developer with expertise in the MERN stack. Skilled in crafting collaborative projects using JavaScript, React, and Node.js, enhancing both front-end and back-end development. A problem solver with strong communication skills, ready to contribute to impactful web development endeavors.

PROJECTS

1. BlueFly | |

HTML | CSS | JavaScript | LocalStorage

- Created BlueFly, a user-friendly e-commerce website specializing in branded clothing
- Implemented login and signup functionality
- Developed responsive design and detailed product pages

2. PlantOrder | |

HTML | CSS | JavaScript | JSON Server

- Developed PlantOrder, a comprehensive nursery e-commerce platform offering various plants
- Created a responsive design and implemented user login and signup
- Designed a user-friendly shopping cart and enabled efficient sorting and filtering of products

3. Weather | |

HTML | CSS | JavaScript

- Designed and built the Weather App, a tool for checking weather conditions and forecasts
- Provided current location weather information
- Implemented search functionality

4. Specialized | |

React | Redux | Chakra UI | HTML | CSS | JavaScript

- Crafted Specialized, an online bicycle store offering a wide range of bicycles.
- Key Features: Ensured responsiveness, implemented login and signup capabilities, developed a seamless shopping cart, enabled sorting and filtering of products, and integrated secure payment processing.
- Personally designed the Cart Page and Payment Page.
- Managed exceptions, validations, and maintained the project's GitHub repository.
- Collaborated with a team of 4 members to complete the project within a 7-day timeframe.

ACHIEVEMENTS

- Aduino Programming, Eagle Foundation
